You and Your Family Can Help Fight Covid-19, Influenza, and other Viruses in Seattle

Your family can play an important part in this research—without leaving home! It only takes a few minutes to sign up.

Why are we doing this study?
We want to see how Covid-19, Flu, and other germs spread in a city. This will help us better understand how to prevent the spread of these viruses.

How can you take part in this study?
If you and your family live in Seattle and have one or more children, your household could take part in this. Here are the steps:

1. Beginning of the school year
   Sign up online at redcap.link/sfshouseholds.
   We will contact you if you are eligible to participate.

2. During the school year
   Fill out weekly surveys and tell us if you or a family member gets sick.

3. If someone gets sick
   Everyone in your family sends us a nose swab in the mail, and we test it for Covid-19 and other viruses.

For more information and to join the study, visit redcap.link/sfshouseholds
